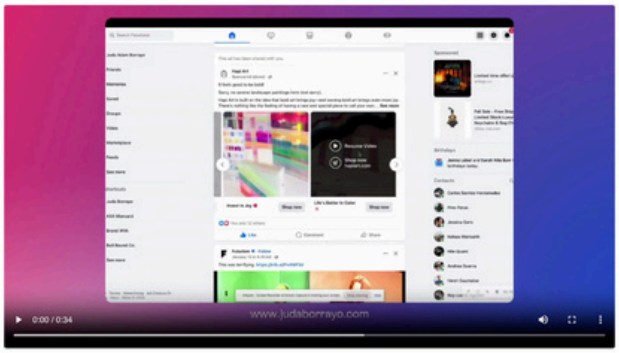
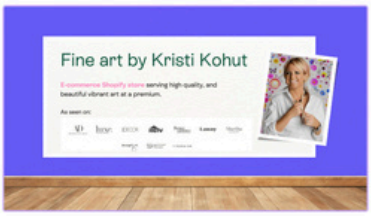
Summary



Hapi Art®, a luxury art and home décor brand, aimed to establish a profitable advertising system from scratch. With no prior paid media strategy or tracking infrastructure, we implemented a comprehensive plan across Meta (Instagram and Facebook), Google Search, and YouTube. Over a six-month period, we turned **$12,588 in ad spend into $105,991 in revenue**, achieving a **17.76 ROAS from cold prospecting ads** and an **8.48 ROAS through retargeting campaigns**. Our tiered strategy and creative optimization established scalable, evergreen campaigns that consistently drive revenue.



Tactics & Strategies

1. **Platform Testing & Optimization**:
   - Tested multiple platforms: Google Search (luxury art keywords), Google Shopping, Google Display, YouTube, and Meta Ads.
   - Identified Meta as the most profitable channel for driving both cold and retargeting traffic.
2. **Creative Strategy**:
   - Developed and edited 20+ creatives using existing assets, emphasizing vibrant colors and 3D aspects of the artwork.
   - Created dynamic video ads featuring UGC-style videos, animations, and slideshows to appeal to target audiences.
   - Wrote on brand copy for 37 ads to test across various initiatives.
3. **Tiered Retargeting**:
   - Designed behavior-based campaigns to target users based on interaction timing:
     - Week 1: Highlighted FOMO with customer testimonials and bold creatives.
     - Week 2: Showcased unique materials and the 3D nature of the artwork.
     - Week 3+: Used limited-time offers to create urgency.
4. **Audience Targeting**:
   - Used lookalike audiences to target luxury buyers and individuals with interests in art, interior design, and home décor.
   - Leveraged dynamic catalog ads to retarget users with pieces they had previously viewed, reinforcing brand recall.
5. **Tracking Enhancements**:
   - Set up offline conversion tracking to ensure proper attribution and allow Meta to optimize for higher-value conversions.

Execution

1. **Paid Media Campaigns**:
   - Built extensive Meta advertising campaigns with prospecting and

retargeting components.

- Utilized automated catalog ads to dynamically showcase art pieces to users who had shown interest.

2. **Creative Execution**:
   - Edited amateur videos filmed by the artist to professional-grade ads using music, captions, and animation.
   - Focused on showcasing the tactile and vibrant qualities of Hapi Art® to create an emotional connection with viewers.
3. **Optimization & Iterative Testing**:
   - Conducted ongoing A/B testing of creatives, targeting options, and ad formats.
   - Scaled high-performing campaigns while maintaining a sustainable CPL and ROAS.
4. **Localization & Audience Insights**:
   - Adapted campaigns to align with audience preferences, focusing on high-value luxury buyers across the United States.

Portfolio — 10x Roas

Profitable Advertising

Through iterative testing we painted the picture that - due to the highly visual nature of the brand - Meta is the platform of choice for this artist.

- We achieved 16 ROAS for Cold Prospecting.
- We achieved 6.9 Retargeting ROAS
- Ads were so engaging we had consistent 5-6% Clickthrough rates.
